### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

##### General information:

Symptoms of poisoning may occur after contact, so if in doubt, consult a doctor in case of direct contact with the chemical product or persistence of indisposition, and present the safety data sheet of this product to the doctor.

##### Following inhalation:

Remove the victim from the exposure site, provide him/her with clean air and keep him/her in a resting position. In severe cases such as cardio-respiratory arrest, apply artificial respiration techniques (mouth-to-mouth resuscitation, cardiac massage, oxygen supply, etc.). Medical advice should be sought immediately.

##### In case of skin contact:

Remove contaminated clothing and shoes, rinse the skin or, if necessary, shower the affected person with plenty of cold water and neutral soap. In severe cases, consult a doctor. If the mixture causes burns or frostbite, do not remove the clothing, as the injury caused may be aggravated if it sticks to the skin. If blisters form on the skin, do not puncture them as this increases the risk of infection.

##### After eye contact:

Flush eyes with plenty of water for at least 15 minutes. If the affected person wears contact lenses, remove them as far as they do not stick to the eyes, otherwise additional injuries may occur. In all cases, a doctor must be consulted as soon as possible after washing and the safety data sheet presented to him.

##### Following ingestion:

Do NOT induce vomiting. If vomiting occurs, hold the head forward to avoid inhalation. Keep the person in a resting position. Rinse mouth and throat as they may have been affected by ingestion.

#### 4.2. Most important symptoms and effects, both acute and delayed

The immediate and delayed effects are given in sections 2 and 11.

#### 4.3. Indication of any immediate medical attention and special treatment needed

not relevant

### SECTION 5: Firefighting measures

#### 5.1. Extinguishing media

##### Suitable extinguishing media:

ABC-powder, Foam, Carbon dioxide (CO<sub>2</sub>)

##### Unsuitable extinguishing media:

Water jet

#### 5.2. Special hazards arising from the substance or mixture

As a result of combustion or thermal decomposition, reactive sub-products are formed that can be highly toxic and therefore pose a high and can therefore pose a high health risk.

#### 5.3. Advice for firefighters

Depending on the size of the fire, it may be necessary to use full protective clothing and autonomous breathing apparatus may be required. There should be a minimum stock of emergency facilities or equipment (fireproof blankets, portable first aid kit, ...) in accordance with Directive 89/654/EC. first-aid kit, ...) should be available in accordance with Directive 89/654/EC.

#### 5.4. Additional information

Proceed in accordance with the internal emergency plan and the information sheets on what to do in the event of accidents and other emergencies. proceed. Keep away all sources of ignition. In case of fire, cool the storage containers and tanks of products that may catch fire or explode or are at risk of BLEVE due to elevated temperatures. The leakage of products used in Avoid leakage of products used in firefighting into groundwater.

### SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

##### 6.1.1. For non-emergency personnel

**Personal precautions:**

Isolate leaks as far as this does not pose an additional risk to the persons involved. Evacuate area and keep away persons without protective equipment. In view of possible contact with the spilled product, the use of personal protective equipment is mandatory (see section 8). Above all, prevent the formation of flammable vapour-air mixtures, either by ventilation or by using a neutralising agent. Keep away all sources of ignition. Prevent electrostatic charges by connecting all conductor surfaces on which static electricity can build up, again keeping them earthed as a whole.

##### 6.1.2. For emergency responders

**Personal protection equipment:**

See section 8.

#### 6.2. Environmental precautions

Prevent leakage into the water at all costs. Store absorbed product appropriately in hermetically sealable containers. In case of exposure to the general population or the environment, inform the competent authorities.

#### 6.3. Methods and material for containment and cleaning up

**Other information:**

Soak up spilled product using sand or neutral absorbent material and take to a safe place. Do not absorb with Do not absorb with sawdust or other flammable absorbents. Disposal: See section 13.

#### 6.4. Reference to other sections

See section 7 for further information on safe handling.

For further information on personal protective equipment: see section 8.

For further information on disposal: see section 13.

### SECTION 7: Handling and storage

#### 7.1. Precautions for safe handling

**Protective measures**

**Advices on safe handling:**

Comply with the legislation in force on the prevention of industrial risks. Keep containers hermetically closed. Keep spilled substances and residues under control and dispose of by safe methods (section 6). Avoid leakage from the container. Places where hazardous products are handled must be kept tidy and clean.

**Fire prevent measures:**

Avoid evaporation of the product as it contains flammable substances and flammable vapour/air mixtures may form in the presence of ignition sources. Control ignition sources (mobile phones, sparks, ...) and decant slowly to avoid the generation of electrostatic charges. For information on conditions and materials to avoid, see section 10.

**Environmental precautions:**

Due to the hazardous nature of this product to the environment, it is recommended that it be handled within an area that has contamination control barriers in the event of a spill and that absorbent material be stored nearby.

**Advices on general occupational hygiene**

Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling.

#### 7.2. Conditions for safe storage, including any incompatibilities

**Technical measures and storage conditions:**

Store in a cool dry place.

**Requirements for storage rooms and vessels:**

Avoid sources of heat, radiation, static electricity and contact with food. Further information (see section 10.5).

Replace if increased breathing resistance or the smell or taste of the pollutant is noticed.

### Other protection measures:

According to the order of priority for workplace control, local extraction in the work zone is recommended as a collective protective measure to avoid exceeding the limit values in the workplace. In case of using personal protective equipment, it must have the "CE marking". For more information on personal protective equipment (storage, use, cleaning, maintenance, protection class,...), see the leaflet provided by the manufacturer. The instructions provided in this article refer to the pure product. Protective measures for the diluted product may vary depending on the degree of dilution, application and application procedure, etc. To determine the required installation of emergency showers or eyewashes in the storage rooms, the regulations for the storage of chemicals applicable in each case are taken into account. For more information, see sections 7.1 and 7.2.

Non-slip work footwear:

Emergency shower: ANSI Z358-1; ISO 3864-1:2011, ISO 3864-4:2011

Eye wash: DIN 12 899; ISO 3864-1:2011, ISO 3864-4:2011

### 8.2.3. Environmental exposure controls
