

OPERATING INSTRUCTIONS (EN) POWER TWISTER ADAPTOR (T865101)

The Power Twister Adaptor changes your Power Twister cleaning gun into a powerful cleaning device for cleaning your car carpets and car seat covers. The Power Twister Adaptor is mounted on top of the Power Twister and connected to the hose of a wet vacuum cleaner.

Mounting and operation of the Power Twister Adaptor

1. Remove the blue nozzle.
2. Slide the Power Twister Adaptor over the Power Twister.
3. Tighten the nut to fix the Power Twister Adaptor to the motor of the Power Twister.
4. From the 4 different adaptors, choose the one that fits on the hose of your vacuum cleaner and use it to connect the Power Twister Adaptor to the hose of your wet vacuum cleaner.
5. Connect the Power Twister to the compressed air supply and switch on the wet vacuum cleaner. Now you are ready to start cleaning your carpets and seat covers thoroughly. Slide the suction nozzle of the Power Twister Adaptor over the surface that needs to be cleaned.

Rocker lever into the vertical position:

The injection of a cleaning agent at high pressure loosens the dirt immediately which is sucked up at the same time by the wet/dry vacuum cleaner.

Rocker lever into the horizontal position:

The gun blows a powerful airflow on to the surface for quick drying.

Before using the Power Twister Adaptor, it is important to read the instruction sheet of the Power Twister. Maximum temperature for using Power Twister Adaptor: 30 °C.
