The selection of a suitable glove depends not only on the material but also on other quality features and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of glove materials cannot be calculated in advance and must therefore be checked before use. Permeation time (maximum wear duration): > 0,5mm / 240 Min.

The exact breakthrough time must be obtained from the protective glove manufacturer and must be observed.

## Body protection:

Protective work clothing (e.g. safety shoes EN ISO 20345, long-sleeved work clothing).

#### Respiratory protection:

Respiratory protection is not required if the room is well ventilated.
