

TPR

CLEAR PRIMER FOR ADHESION IMPROVEMENT OF GLUE AND PAINT

- Excellent for very flexible synthetic materials
- Ideal before application of paints and primers
- Can be used for MS-, PU- and MMM-adhesives and adhesives tapes
- Easy application

TECHNO PRIMER

General Information

TECHNO PRIMER was especially developed to improve the adhesion of glues and paints on difficult materials such as synthetic materials based on PP or PPE. TECHNO PRIMER is optimally used in the automotive sector for example as an adhesion promoter on

bumpers and plastic parts before the application of paints and primers. You should always test the product before you apply it over large areas. Not suitable for very porous surfaces.

Technical Information

Aggregate State: Aerosol
Colour: brown
Odour: solvent-like
Initial boiling point and boiling range: < 0 °C
Flash point: < 0 °C
Water solubility: practically insoluble (20 °C)

Working temperature: 10°C
Drying time: 20-30min (at 20°C)
Relative density: 0,90 (+/- 0,5%)
Storage: in a cool and dry place

Application and Use

- Ideal for application on smooth surfaces and not very porous.
- Clean the surfaces with MEGA FOAM or SAFE CLEAN before applying the product.
- Ensure surfaces are dry and free of dirt and grease.
- Shake the can well for 2-3 minutes.
- Apply in thin layers.
- Observe the drying times and apply the adhesive (glue or tape).
- After use, turn the can to 360° angle and spray until only gas is released to clean the nozzle.
