Techno Screen MS 290ml

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1. Product identifier

Trade name/designation:

Techno Screen MS 290ml

Article No.:
T570101

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the substance/mixture:
1-component moisture cure, methoxy silane based, adhesive/sealant for various industrial applications.

1.3. Details of the supplier of the safety data sheet

Supplier:

KANDO Service GmbH
Hartleitnerstraße 3
4653 Eberstalzell
Austria
Telephone: +43 (0) 7241 213 79
E-mail: msds@kando.eu

1.4. Emergency telephone number

Vergiftungsinformationszentrale (VIZ), Stubenring 6, 1010 Wien, 24h: 01 406 43 43, Montag - Freitag: 8 bis 16 Uhr, Tel.: 01 406 68 98 (keine medizinische Auskunft) (Only available during office hours.)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification according to Regulation (EC) No 1272/2008 [CLP]
The mixture is classified as not hazardous according to regulation (EC) No 1272/2008 [CLP].

*
2.2. Label elements

Labelling according to Regulation (EC) No. 1272/2008 [CLP]
Hazard statements: none

Supplemental hazard information	
EUH208	Contains trimethoxyvinylsilane. May produce an allergic reaction.
EUH210	Safety data sheet available on request.

Precautionary statements: none

*
2.3. Other hazards

Other adverse effects:
The product does not meet the PBT/vPvB criteria.
The product does not meet the criteria regarding its endocrine disrupting properties.

SECTION 3: Composition/information on ingredients

* **3.2. Mixtures**

Hazardous ingredients / Hazardous impurities / Stabilisers:

SECTION 4: First aid measures

* **4.1. Description of first aid measures**

General information:
Symptoms of poisoning may occur after contact, so if in doubt, consult a doctor in case of direct contact with the chemical product or persistence of indisposition, and present the safety data sheet of this product to the doctor.

Following inhalation:
This is a product that is not classified as hazardous by inhalation. However, it is recommended that in case of symptoms of poisoning, it is recommended to remove the person from the place of exposure, provide him/her with clean air and keep him/her at rest. position. Consult a doctor if symptoms persist.

In case of skin contact:
This is a product that is not classified as dangerous in contact with the skin. Nevertheless, it is recommended that in case of However, in case of contact with the skin, it is recommended to remove contaminated clothing and shoes, to rinse the skin or, if necessary, to shower the affected person with with plenty of cold water and neutral soap. In severe cases, consult a doctor.

After eye contact:
Flush eyes with plenty of water for at least 15 minutes. If the affected person wears contact lenses, remove them as far as they do not stick to the eyes, otherwise additional injuries may occur. In all cases, a doctor must be consulted as soon as possible after washing and the safety data sheet presented to him.

Following ingestion:
In case of ingestion, seek medical attention immediately and provide the doctor with the safety data sheet of this product. present to the doctor.

* **4.2. Most important symptoms and effects, both acute and delayed**
The immediate and delayed effects are given in sections 2 and 11.

4.3. Indication of any immediate medical attention and special treatment needed
Consult a doctor if symptoms persist. Treat symptomatically.

SECTION 5: Firefighting measures

* ### 5.1. Extinguishing media
Suitable extinguishing media:
Product not flammable under normal storage, handling and application conditions, contains flammable substances. In the event of ignition due to improper handling, storage or use, fire extinguishers with polyvalent powder (ABC powder) should preferably be used in accordance with the Ordinance on Fire Protection Installations.
Unsuitable extinguishing media:
Water jet

* ### 5.2. Special hazards arising from the substance or mixture
Avoid inhalation of combustion products.
Hazardous combustion products:
As a result of combustion or thermal decomposition, reactive sub-products are formed that can be highly toxic and therefore pose a high and can therefore pose a high health risk.

* ### 5.3. Advice for firefighters
Depending on the size of the fire, it may be necessary to use full protective clothing and autonomous breathing apparatus may be required. There should be a minimum stock of emergency facilities or equipment (fireproof blankets, portable first aid kit, ...) in accordance with Directive 89/654/EC. first-aid kit, ...) should be available in accordance with Directive 89/654/EC.

* ### 5.4. Additional information
Proceed in accordance with the internal emergency plan and the information sheets on what to do in the event of accidents and other emergencies. proceed. Keep away all sources of ignition. In case of fire, cool the storage containers and tanks of products that may catch fire or explode or explode or are at risk of BLEVE due to elevated temperatures. The leakage of products used in Avoid leakage of products used in firefighting into groundwater.

SECTION 6: Accidental release measures

* ### 6.1. Personal precautions, protective equipment and emergency procedures
6.1.1. For non-emergency personnel
Personal precautions:
Isolate leaks as far as this does not pose an additional risk to the persons involved. Evacuate area and keep away persons without protective equipment. In view of possible contact with the spilled product, the use of personal protective equipment is mandatory (see section 8). Above all, prevent the formation of flammable vapour-air mixtures, either by ventilation or by using a neutralising agent. Keep away all sources of ignition. Prevent electrostatic charges by connecting all conductor surfaces on which static electricity can build up, again keeping them earthed as a whole.
Protective equipment:
Wear protective equipment. Keep unprotected persons away.
6.1.2. For emergency responders
Personal protection equipment:
Personal protection equipment: see section 8

6.2. Environmental precautions
Taking into account Community legislation on environmental protection, it is recommended to avoid leakage of both the product and its packaging into the environment. For further information, see section 7.1.

* ### 6.3. Methods and material for containment and cleaning up
Other information:
Soak up spilled product using sand or neutral absorbent material and take to a safe place. Do not absorb with Do not absorb with sawdust or other flammable absorbents.

6.4. Reference to other sections

See section 7 for further information on safe handling.
For further information on personal protective equipment: see section 8.
For further information on disposal: see section 13.

SECTION 7: Handling and storage

* **7.1. Precautions for safe handling**

Protective measures

Advices on safe handling:
With regard to the handling of loads, comply with the legislation in force on the prevention of industrial risks. Maintain order and cleanliness and carry out disposal using safe methods (section 6).

Fire prevent measures:
Avoid evaporation of the product as it contains flammable substances and flammable vapour/air mixtures may form in the presence of ignition sources. Control ignition sources (mobile phones, sparks, ...) and decant slowly to avoid the generation of electrostatic charges. For information on conditions and materials to avoid, see section 10.

Environmental precautions:
It is recommended to have absorbent material in the immediate vicinity of the product (see section 6.3).

Advices on general occupational hygiene
Do not eat, drink or smoke when using this product.

* **7.2. Conditions for safe storage, including any incompatibilities**

Technical measures and storage conditions:
storage temperature: 5 - 25°C
Maximum storage period (time): 18 month(s)

Requirements for storage rooms and vessels:
Avoid sources of heat, radiation, static electricity and contact with food. Further information (see section 10.5).

Storage class (TRGS 510, Germany): 10 – Combustible liquids that cannot be assigned to any of the above storage classes

7.3. Specific end use(s)

Recommendation:
With the exception of the instructions already listed, no special recommendations are required regarding the use of this product.

SECTION 8: Exposure controls/personal protection

* **8.1. Control parameters**

8.1.1. Occupational exposure limit values

8.2. Exposure controls

8.2.1. Appropriate engineering controls

As a precautionary measure, the use of basic individual protective equipment with the appropriate CE marking is recommended. For further information on individual protective equipment (storage, use, cleaning, maintenance, protection class...), please refer to the information brochure of the respective manufacturer. The indications given in this point refer to the pure product. The protective measures for the diluted product may differ depending on the degree of dilution, use, application method, etc. To determine the obligation to install emergency showers and/or eyewash devices in the warehouses, the respective applicable regulations regarding the storage of chemical products must be taken into account. For more information, see sections 7.1 and 7.2.

8.2.2. Personal protection equipment

Eye/face protection:

Wear protective goggles if necessary. Panorama safety goggles against splashes and / or ejection. CE CAT II, EN 166:2002, EN ISO 4007:2018. Clean daily and disinfect at regular intervals according to the manufacturer's instructions. Use when there is a risk of splashing is recommended.

Skin protection:

Hand protection:

Wear protective gloves. (CE CAT I). Replace the gloves before any possible damage occurs. If you use the product for a long time due to professional/industrial use, then you should use gloves of type CE III or according to the standards EN 420:2004+A1:2010 and EN ISO 374-1:2016+A1:2018.

As the product is a mixture of different materials, the resistance of the glove material cannot be calculated in advance and must be verified shortly before use.

Body protection:
Wear suitable work clothing. CE CAT I. Replace before signs of deterioration appear. CE III is recommended for professional/industrial users exposed to the substance for prolonged periods, in accordance with EN ISO 6529:2013, EN ISO 6530:2005, EN ISO 13688:2013, EN 464:1994 regulations. Non-slip work footwear. CE CAT II, EN ISO 20347:2012. Replace before signs of deterioration appear. CE III is recommended for professional/industrial users exposed to the fabric for prolonged periods, in accordance with EN ISO 20345:2012 and EN 13832-1:2007 regulations.

Respiratory protection:
The use of protective equipment is required in case of fog formation or in case of exceeding the limits for professional exposure limits are exceeded.

Other protection measures:
Emergency shower: ANSI Z358-1 ISO 3864-1:2011, ISO 3864-4:2011
Eye wash: DIN 12 899 ISO 3864-1:2011, ISO 3864-4:2011

8.2.3. Environmental exposure controls
Taking into account Community legislation on environmental protection, it is recommended to avoid leakage of both the product and its packaging into the environment. For further information, see section 7.1.

SECTION 10: Stability and reactivity

* **10.1. Reactivity**
No dangerous reactions are known under normal conditions of use.

10.2. Chemical stability
The product is stable under storage at normal ambient temperatures.

10.3. Possibility of hazardous reactions
No hazardous reactions expected under normal conditions.

* **10.4. Conditions to avoid**
Heating may cause a fire or explosion. Protect from sunlight. Do no expose to temperatures exceeding 50 °C.

* **10.5. Incompatible materials**
Materials to avoid: Avoid strong acids, alkalis and bases. Avoid direct exposure to materials that promote combustion.

* **10.6. Hazardous decomposition products**
See sections 10.3, 10.4 and 10.5 for specific degradation products. Depending on the degradation conditions, complex mixtures of chemical substances may be released during degradation: Carbon dioxide (CO2), carbon monoxide and other organic compounds.

SECTION 11: Toxicological information

* **11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008**

12.6. Endocrine disrupting properties
The product does not meet the criteria regarding its endocrine disrupting properties.

12.7. Other adverse effects
Water hazard class 1: slightly hazardous to water

SECTION 13: Disposal considerations

*
13.1. Waste treatment methods
Dispose of by the authorised waste manager in accordance with the recovery and disposal operations set out in Annex 1 and Annex 2 (Directive 2008/98/EC). According to codes 15 01 (2014/955/EC), if the container has been in direct contact with the product, treat it in the same way as the product itself, otherwise as if there were no hazardous residues. Do not allow to enter drains. See section 6.2.

In accordance with Annex II of Regulation (EC) No 1907/2006 (REACH), the Community or national provisions regarding waste recovery shall be complied with. Community legislation: Directive 2008/98/EC, 2014/955/EC, Regulation (EU) No 1357/2014. National regulations: Act on the Reorganisation of the Recycling and Waste Management Law. SECTION 15: Regulatory information

* **15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture**

15.1.1. EU legislation

Authorisations:

Substances for which authorisation in Regulation (CE) 1907/2006 (REACH) is pending: Not relevant. Substances included in REACH Annex XIV (authorisation list) and expiry date: Not relevant. Regulation (EC) 1005/2009 on ozone depleting substances Not relevant. Article 95, REGULATION (EU) No 528/2012: Not relevant. REGULATION (EU) No 649/2012 on the export and import of dangerous chemical substances: Not relevant.
Restrictions on the distribution and use of certain substances and hazardous mixtures (Annex XVII REACH, etc...):
Contains di-“isononyl” phthalate. (1) Shall not be used as substances or in mixtures in concentrations greater than 0,1 % by weight of the plasticized material in toys and childcare articles which can be placed in the mouth by children. (2) Such toys and childcare articles containing these phthalates in concentrations greater than 0.1% by weight of the plasticized material shall not be placed on the market. (4) For the purposes of this entry, the term “childcare article” means any article intended to facilitate sleep, relaxation, hygiene, feeding and sucking of children.
Shall not be used:
-in decorative articles intended to produce light or color effects (by phase change), e.g. in mood lamps and ashtrays;
-in joke games;
-in games for one or more participants or in products intended for use as such, including for decoration.

Contains dioctyltin oxide. Dioctyltin compounds (DOT) shall not be used in the articles listed below intended to be supplied to or used by the general public after January 1, 2012, if the concentration of tin in the article or parts thereof exceeds 0.1% by weight:
- Textile articles intended to come into contact with the skin - Gloves
- Shoes or parts thereof intended to come into contact with the skin
- Wall and floor coverings

Shall not be placed on the market or used as substances or in mixtures when acting as biocides in paints whose components are not chemically bound. Shall not be placed on the market or used as substances or in mixtures as biocides to prevent fouling by micro-organisms, plants or animals on: (a) all vessels, irrespective of their length, used on sea waterways, coastal and estuarine waterways, inland waterways and lakes (b) boxes, floats, nets and other equipment or devices for fish and shellfish farming (c) fully or partially submerged equipment or devices of any kind. May not be placed on the market or used as substances or in mixtures intended for the treatment of water in industrial, commercial and municipal applications. Occupational exposure to respirable crystalline silica must be controlled in accordance with Directive (EU) 2019/130.

Specific injunctions concerning personal and environmental protection: It is recommended that the information in this safety data sheet be used as input to data collected in a risk assessment of local conditions in order to take the necessary measures to prevent hazards for the management, use, storage and disposal of this product.

Other regulations (EU):

Directive 2012/18/EU on the control of major-accident hazards involving dangerous substances [Seveso-III-Directive]: This product is not assigned to a hazard category.

Directive 2004/42/EC on the limitation of emissions of volatile organic compounds:

Volatile organic compounds (VOC) content in percent by weight: 0.98 weight-%
