TECHNO PRIMER

CLEAR PRIMER FOR ADHESION IMPROVMENT OF GLUE AND PAINT

- Excellent for very flexible synthetic materials
- Ideal before application of paints or adhesives
- Can be used for MS-, PU- and MMA-adhesives and adhesives tapes
- Easy application

General Information

TECHNO PRIMER was especially developed to improve the adhesion of glues and paints on difficult materials such as synthetic materials based on PP or ABS. TECHNO PRIMER is optimally used in the automotive sector for example as an adhesion promoter on bumpers and plastic parts before the application of paints and adhesives.

Important notes: The product should always be tested on a small area before applying to large surfaces. It does not adhere to PE (Polyethylene) materials and is not suitable for very porous surfaces.

Technical Information

Aggregate State: Aerosol
Colour: clear
Odour: solvent-like
VOC: 98,78 Vol- %
Initial boiling point and boiling range: < 0 °C
Flash point: < 0 °C
Self ignition temperature > 250 °C
Water solubility: practically insoluble (20 °C)
Working temperature: 10°C to 35°C
Drying time: 20-30min (at 20°C)
Storage: in a cool and dry place

Application and Use

- APPLICATION
- Ideal for application on smooth surfaces and not porous
- It is recommended but not mandatory to water sand the surfaces with 1500 grain
- Clean plastic-surfaces (absorbent surfaces) with CLEAN SPRAY on DRY CLOTH before applying the product
- Non absorbent surfaces can be cleaned with SAFE CLEAN on DRY CLOTH e.g. metal, glass, ceramics,...
- USE:
- Ensure surfaces are dry and free of dirt and grease
- Shake the can well for 2-3 minutes
- Apply one thin layer and observe the drying times
- Apply the e.g. color, glue, adhesives,.... on the dryed TECHNO PRIMER
- After use, turn the can upside down and spray until only gas is released to clean the nozzle
