SECTION 4: First aid measures

* **4.1. Description of first aid measures**

General information:

Do not leave affected person unattended. Remove victim out of the danger area. If unconscious, position and transport in stable lateral position. Never give anything by mouth to an unconscious person or a person with cramps. Take off contaminated clothing. Symptoms may develop several hours following exposure; medical observation therefore necessary for at least 48 hours. If in doubt, or if you experience any symptoms, contact a doctor.

Following inhalation:

Provide fresh air. In the event of irregular breathing or respiratory arrest, seek medical assistance immediately and initiate first aid measures. Call a POISON CENTER or doctor/physician if you feel unwell.

In case of skin contact:
Rinse immediately contaminated clothing and skin with plenty of water before removing clothes.
Immediately call a POISON CENTER or doctor/physician.

After eye contact:
Rinse opened eye immediately with plenty of water for at least 15 minutes. Remove contact lenses. If symptoms persist, consult a doctor.

Following ingestion:
If swallowed, rinse mouth with water (only if the victim is conscious). Make the victim drink plenty of water in small sips (dilution effect). Do NOT induce vomiting. Immediately call a POISON CENTER or doctor/physician.
