

SB60

HYBRID POLYMER FOR FLEXIBLE BONDING AND SEALING

- Can be used on both dry and wet surfaces.
- Can be painted after 15 minutes.
- Unique bonding on most materials - without using a primer: metal, lacquer, primer, polyester, zinc, aluminium, wood, ...
- Does not contain any solvents or isocyanates, is odourless.
- Cures without shrinking, resists vibrations and remains flexible.
- Excellent chemical resistance after curing.
- High tensile strength and unique bonding - 265 N/cm².
- UV and weather resistant, anti-fungal and bactericidal.
- Easy to apply and to structure.
- Available in 5 colours: white, black, beige, grey and brown.

SEAL & BOND MS 60

GENERAL INFORMATION

SEAL & BOND MS 60 is based on hybrid polymers and is phthalate, isocyanate, solvent and silicone-free. As a result SEAL & BOND MS 60 is almost odourless and completely neutral so that the

adhesion on blank metals and on most materials offers limitless possibilities. On difficult synthetic materials it is advisable to use Seal & Bond Special Primer or Seal & Bond Special Primer PPE.

TECHNICAL INFORMATION AND PACKAGING

See Technical Datasheet.

APPLICATION AND USE

- **BUILDING**
- bonding of insulation, even on wet surfaces. SEAL & BOND MS 60 does not dissolve polystyrene foam
- as mounting adhesive for bonding of skirting boards, lathing, sidings, eaves, laths, on brick, Gyproc, cellular concrete, Ytong, concrete, mortar, ... SEAL & BOND MS 60 replaces mechanical attachments as sealant for both wet and difficult surfaces. Does not attack natural stone like marble, Belgian blue stone and granite. Ideal as sealant between windows and brickwork. Can be painted perfectly, even with acrylate dispersion paints
- windows and verandas: bonding of glass in synthetic and aluminium profiles, bonding of adhering pieces and corners pieces in production of windows
- **AIRCONDITIONING - VENTILATION:**
- sealing of both PVC and metal tubing, excellent
- **CONSTRUCTION**
- bonding of ferrous and non-ferrous plates on window works
- bonding of mirrors, does not attack the silver coating (always apply the adhesive in vertical lines)
- bonding of decorative panels
- in the construction of elevators: good adhesion to painted surfaces
- bonding of wooden or metal table tops
- bonding of characters and name plates on gravestones and fronts
- sealing and bonding of containers
- **SANITARY**
- as sealant, even on wet surfaces. Does not attack acrylate. SEAL & BOND MS 60 is UV resistant, anti-fungal and bactericidal
- **TIP:** For less strong surfaces such as a few wood species, old bricks, concrete, cellular concrete, ... we advise the use of Fixapox.
- **CAR BODY & GARAGE**
- bonding of body parts: steel/steel without using a primer
- joint sealant: sealing of welded and sheet metal work joints - easy to structure and to paint
- bonding of spoilers and extension kits - good adhesion on paintwork and polyester
- sealing of water leaks, can be used on wet surfaces
- bonding of several materials. Excellent bonding on metal, primer, paintwork, zinc coating, aluminium, wood, most synthetic materials
- **NOTE:**
- Alkyd resin-based lacquer, applied to SEAL & BOND MS 60 can have a slower drying process.
- SEAL & BOND MS 60 has a lower adhesion on PP, PE, Bitumen and silicones.
