

# QIX

## SUPERSTRONG AND SUPERFAST CHEMICAL ANCHORING

- The technology if anchoring has to be done, even at freezing temperatures of -5°C!
- Can be used in both dry and damp bore-holes, and even under water.
- Exceptionally chemical and UV resistant.
- Anchors in both solid and hollow bricks, concrete blocks, Ytong, ...
- Extremely long shelf life, 18 months whether opened or unopened.
- Simple, handy and easy to process.

# Q-FIX 120

## GENERAL INFORMATION

Q-FIX 120 has been specially developed for heavy load bearing chemical anchors in hollow and solid materials such as stone, concrete, aerated concrete, ... Q-FIX 120 is a waterproof, impermeable attachment. Q-FIX 120 is a vinyl ester

resin that has the best mechanical characteristics and offers better chemical resistance. Q-FIX 120 also has all of the required permits: the European Technical Approval (ETA/CE) option 7 for uncracked concrete and fire class F120.

## TECHNICAL INFORMATION AND PACKAGING

Basis: vinyl ester resins.  
 Colour: grey.  
 Odour: weak odour, styrene-free.  
 Temperature resistance: to +80°C, with peaks to +120°C.  
 Application temperature of the cartridge: +/- 20°C.  
 Storage: 5 to a maximum of 25°C.  
 Certificates: F120 and ETA.

Adhesion: very good adhesion on all porous material; less good to poor adhesion on smooth surfaces.  
 Shelf life: 12 months, keep dry, cool and frost-proof.  
 Safety measures: consult the Safety Data Sheet.

## APPLICATION AND USE

- CHEMICAL ANCHORING
- to anchor reinforcement rods (concrete construction)
- mounting rails, fences, masts, antennas, sun shields, roll-down shutters, lift casings, heating and cooling systems, ... by using anchored wire rods
- hooks, bolts, hinges, profiles, ...
