WAE

WASP EX

SPRAY AGAINST WASPS AND THEIR LARVAE

- Extremely large spray nozzle for targeted destruction
- Fast knock-down effect due to wide and powerful sprayjet
- Enables the control of the nest from a safe distance of 4 -5 metres
- Biocidal product

GENERAL INFORMATION

WASP EX is a spray to control wasps and their lavae. Due to its special composition, WASP EX achieves an extremely strong immediate and lasting effect. With WASP EX, both adult wasps and their larvae on and in the nest can be successfully and safely controlled. The formula stuns the wasps and brings them down and finally destroys them permanently. The special feature of the safe application is the extremely large spray nozzle, which not only has a powerful and wide output, but also a long range. This allows wasps nests to be destroyed from a safe distance up to 4 - 5 metres.

TECHNICAL INFORMATION

Form: liquid
Colour: colourless
Flash point: < 0°C
Density: approx. 0,8
VOC: 618 g/l

APPLICATION AND USE

- APPLICATION:
  - The best time to control wasps nests is early in the morning or before nightfall. At this time all insects are still in the nest or have already returned.
  - Point the spray jet directly at the nest and wasps flying from the nest from a distance of a few metres by pushing the spray button in pulses (max. 2 - 3 seconds).
  - The sustained effect of the spray also includes latecomers, which only become visible after control has been carried out to the nest. Regeneration of a wasp detected by WASP EX is not possible due to its rapid killing effect.
  - The wasp flight is strongest in the months of August to October. With a successful wasp control during this period, you can also prevent the formation of young queens.
  - Shake vigorously before use!
- USE:
  - WASP EX is suitable for use against all types of wasps, in rooms infested by wasp colonies and for targeted control of wasp nests in niches, attics, barns, sheds and other places preferred by wasps.
  - ! Do not use as a room spray in living rooms and bedrooms !
  - Always look for appropriate clothing when controlling wasps: hstureadgear (no long open hair), no short sleeves, sturdy shoes.
  - In the case of standing aids, ensure a firm hold (recoil)!
