COMPATIBILITY CEMENT / CONCRETE with Tech-No-Ice

Dear sir,

we confirm you that the product Tech-No-Ice is compatible and does not damage the cement and concrete floors .

In fact, our specific formula used in the normal conditions of use (specified in the data sheet): 2 kg / 10 m² does not attack the concrete or cement.

Its superior efficacy with traditional ' salts ' allows to use less product to obtain equally result.

Best regards
